Dear Dr. Camin:

A public meeting has been scheduled for Wednesday evening, September 16, 1981 at 7:00 p.m. in Lecture Hall #2 of the Academic Building at Jefferson College in Hillsboro, Missouri. This meeting is a joint effort between the state and federal agencies involved in the environmental studies needed for the Corps of Engineers' Pine Ford planning effort. A copy of the proposed agenda is attached.

Since you have expressed an interest in this meeting or have attended previous meetings, I trust that this forum will be of value to you. If you have further questions, please contact Mr. Joseph Bachant in my office.

Sincerely,

Larry R. Gale

BIG RIVER ENVIRONMENTAL STUDIES

Public Information Meeting

September 16, 1981
7:00 p.m.

Lecture Hall #2, Academic Building
Jefferson College, Hillsboro, Missouri

The Army Corps of Engineers, U. S. Fish and Wildlife Service, the Missouri Department of Natural Resources and the Missouri Department of Conservation have mutual concerns and obligations in the planning of the Pine Ford Reservoir on the Big River in the Meramec Basin, Missouri. These concerns and obligations, as well as the status of the studies on the environmental aspects of this project, will be reviewed for the interested public.

AGENDA

1. Introduction to the roles of the agencies
2. Present status of the Pine Ford planning efforts
3. Ongoing Aquatic Habitat Evaluation Study
4. Myotine Bat Studies
5. Fish and Wildlife Coordination Report Status
6. Archaeological Studies
7. Heavy Metal Studies
8. Lower Meramec Flood Reduction Study
9. Conclusion and upcoming events

TELEPHONE CONVERSATION RECORD

DATE OF CALL: 9-11-81 TIME OF CALL: 1:30P
 PERSON ASKED FOR: Joe Bochant PERSON CALLING: RM Fenemore
 OFFICE AND/OR PHONE: Mo. Doc - 9-1-314-757-4115

SUBJECT: Mo. Doc Public Meeting on Pine Ford / Big River Study
 DISCUSSION: Asked for purpose of 9-16 meeting and whether EPA should attend. He indicated it was a wrap-up meeting to let public know of their ^{Big River} study results. He did not think EPA needed to attend.

We discussed status and interest in Pine Ford. He indicated water supply was becoming an issue due to the Meramec Basin situation (pre-dam) report. However, he doubted either much need or demand at present, but could develop in future. The FWS / COE water quality / fish tissue study has some high metal #s. The effect on water supply, situation, etc., is unknown. Actual heavy metals #s have not been released.

I told him of the COE request to EPA and our limited resources to respond. He doubts COE will do much until 10-1-81, and then doubts much can be done in remaining 10-12 months.

COE public meetings on Pine Ford on Oct. 27, 28.
